

Exchange student program (revised edition 2017/4)

Introduction

- Studying in China is an exciting way to enhance students' career prospects and create valuable industry contacts. The program will promote personal and professional cultural awareness. We also offer students the opportunity to know Traditional Chinese Medicine.
- Undergraduate nursing students can take a three-week study tour to gain invaluable professional and life experience.
- Lectures will be provided to enrich foreign students' knowledge on Chinese medical system, traditional Chinese medicine used in health promotion and nursing, et al. Furthermore, TCM practice is provided for students to attach and experience the TCM skills under clinical teachers' guidance.
- Welcome foreign nursing student and faculty participate in the program. If foreign nursing school provide the same conditions for our nursing student and faculty when we participate the common program in oversea, the whole program is free and the same time we provide free accommodation (including room, food, air condition and electricity) and transportation in China.
