LA HAUTE ECOLE DE SANTE VAUD RECHERCHE

Associate Professor

Radiologic Medical Imaging Technology (Bsc)

MAIN MISSIONS

This position aims to provide and develop academic leadership in teaching and research in Radiologic Medical Imaging Technology (RMIT). You are expected to contribute to one of the following domains of expertise: radiography, computed tomography, magnetic resonance imaging, nuclear medicine and radiation therapy. You will be actively involved in the design, development, and evaluation of RMIT curriculum at pre- and post-graduate level. Within the curricular context of the faculty, you will be responsible for bachelor or master courses in your domain(s) of expertise. You will supervise bachelor and master theses and accompany PhD students. You will lead and/or participate in research programs or projects financed with external funds, and contribute through scientific presentations and professional peer-reviewed publications. You will maintain and develop a network of national and international relationships in your domain(s) of expertise.

YOUR PROFILE

You hold a doctoral degree in Radiography/Medical Imaging and Radiotherapy and are involved in national and international scientific and professional radiographers' networks. You have sound teaching skills and have taught for at least five years in an academic or clinical setting. You are able to teach in French and in English. You have excellent interpersonal skills, are able to work within a interprofessional team and have competence with modern technology. You are a strong collaborator, scholarship promotor, radiographer leader, educator and researcher with valuable experience in developing, conducting, funding and publishing research in your domain of expertise.

Application deadline: 28 february 2022

Entry into office: 1st September 2022
